TIME MANAGEMENT TRAINING COURSE OUTLINE

FOREWORD

Understanding, identifying and defining your long-term goals is the very first step for effective time management. With the broader goal in the background, you can now set a series of short-term goals that will guide you to the longer-term goal.

By applying the skills taught in Time Management Training, you can optimize your efforts to ensure that you concentrate as much of your time and energy as possible on the high payoff tasks. This ensures that you achieve the greatest benefit possible with the limited amount of time available to you. Contrary to popular belief, effective time management is not based on doing more things in less time, but in prioritizing, organizing, focusing efforts and managing more effectively.
